| 1.Keyword | Definition |
| :--- | :--- |
| Pressure | Force divided by area |
| Density | The mass per unit of volume of a substance |
| Moment | Turning force around a pivot |

## 2. Pressure in liquids

Acts in all directions

Pressure $\left(N / m^{2}\right)=\operatorname{Force}(N) / \operatorname{Area}\left(m^{3}\right)$

Movement of Gas Particles in a Container

## Distance Time Graphs

A distance time graph is a useful way to represent the motion of an object. It shows ho the distance move from a starting point changes over time.

If the line is horizontal, the object is stationary (because the distance stays the same).
If the line is a straight diagonal, the object is moving at a constant speed.

The steeper the line, the greater the gradient and the greater the speed.

| 3. Motion keywords |  |
| :--- | :--- |
| Accelerate | Speeding up |
| Decelerate | Slowing down |
| Constant speed | Staying the same <br> speed |
| Stationary | Not moving |
