

# Year 11 Physics 6: Waves Knowledge Organiser

1. Keywords	
Transverse wave	A wave where the vibration is perpendicular to the direction of travel
Longitudinal wave	A wave where the vibrations are parallel to the direction of travel
Mechanical wave	A vibration that travels through a substance (e.g. sound)
Frequency	The number of wave fronts passing a fixed point every second (measured in Hz)
Period	The time for one complete wave
Ultrasound	Sound above 20,000Hz
Superposition	When two waves meet and affect each other
Reflection	When waves bounce off a surface
Echo	Reflection of sound that can be heard

Comparing waves:	Light wave	Mechanical wave
Type of wave	Transverse	Longitudinal
Can they travel through a vacuum?	Yes	No. Mechanical waves can only pass through a solid, liquid or gas
Can they be reflected?	Yes. By smooth shiny surfaces	Yes. By smooth surfaces
Can they be absorbed?	Yes. By dark surfaces	Yes. Rough surfaces absorb sound
Can superposition occur?	Yes	Yes

# Year 11 Physics 6: Waves Knowledge Organiser

8. The properties of EM waves on materials (HT ONLY)	
1	Transmit
2	Specular Reflection
3	Diffuse Reflection
4	Absorb
5	Refract

1

2

3

4

5

2. Period and frequency	
$T=1/f$	
T	Period (s)
f	Frequency (Hz)

9. Uses of EM waves	
Name	Use
Radio	Radio and TV
Microwaves	Satellite communication, cooking food
Infrared	Electric heaters, cooking food, infra-red cameras
Visible	Fibre optic communication
Ultra violet	Energy efficient lamps, sun tanning
X rays	Imaging bones
Gamma rays	Radiotherapy, medical imaging

4. Wave equation	
$v=f \times \lambda$	
v	Wave speed (m/s)
f	Frequency (Hz)
$\lambda$	Wave length (m)
